

Italy is the perfect hostess for an exhibition dedicated to the construction of tunnels and associated services. With around 250 tunnels over 500 meters long, the country has almost half of total European Union. Considering also the thirty projects under construction and those planned, the peninsula will soon have 65 tunnels the length over 3000 meters.

On days 8, 9 and 10 June was held in Turin, the third edition of the fair ITALIAN INTERtunnel, which as the name suggests refers to the gallery world in general, from design to manufacturing systems with all accessories and appurtenances.

Grechi Illuminazione Srl has been a great success, encouraged by the high number of visitors.

The event was an unmissable event for all industry-leading and non-Italians who want to strengthen existing business relationships and create new.

The fair despite its disclosure is still in expansion has already been hailed as leading trade fair, thanks to conferences and meetings held during its development.

INTERtunnel us so happy and being the event that best represents this world as sectoral and specialized sanctioned the Grechi as Leader and Italian reference company in the production of lighting systems for tunnels.

At this important event, Grechi, as his custom, in a business logic of continuous innovation, has also submitted a series of new products, with particular focus on LED array, a technology that Grechi is now dominated with total mastery and great results, it shows how much attention the company is developing communication and investment towards the future:

COMPLETE SET OF THE SYSTEM "GLED TUNNEL" (permanent lighting)

And **PRESENTATION OF THE NEW "EXTREME GLED"**

(lighting reinforcement, modular unit suitable for LED lighting technology of tunnel, tunnels, underpasses and interiors. The modern and futuristic design make it an object hi-tech with the guarantee of an integrated design to ensure the correct operating temperature of the LED, also the special design of a project allows wide flexibility of use.)

MINIS

(new projector led by gallery, cast aluminum suitable for permanent lighting, in a compact but high-yield lighting)

ESTREMA

(new armor Street LED)

GIOTTO

(LED lighting system from the new design is completely configurable and controlled remotely via wireless network)

We also stress the presence in our stand with us, partner with the Integrated Project ERIDIO SCT, SCT proposes an integrated system that can do over time to ensure the required safety levels and reduce operating costs by 35% annum, this is possible by optimizing the yield of the plants and reducing the frequency and complexity of maintenance.

We take this opportunity to thank all those who went to visit us.

... And ...See you next show !!!!!
